Cold Regions Science and Technology 26 (1997) 233

cold regions science and technology

Contents Volume 26 (1998)

Research Papers

Estimating seasonal values of thermal diffusivity in thawed and frozen soils using temperature time series
K.M. Hinkel 1

Numerical simulation of ice transport over the Lake Erie–Niagara River ice boom
H.T. Shen, S. Lu and R.D. Crissman 17

The modern Alpine ski
B. Glenne, A. DeRocco and J. Vandergrift 35

The influence of variable-thickness ice on the loads exerted on sloping structures
G.W. Timco and A.M. Cornett 39

Eccentric impact of an ice feature: non-linear model
D.G. Matskevitch. 55

On creep deformation at plane contact problems
P.-L. Larsson 67

Analysis of primary creep of S2 fresh-water and saline ice
K. Abdel-Tawab and G.J. Rodin. 83

Research Papers

Particle-image velocimetry for whole-field measurement of ice velocities
R. Ettema, I. Fujita, M. Muste and A. Kruger 97

Modelling the dynamics and thermodynamics of icebergs
G.R. Bigg, M.R. Wadley, D.P. Stevens and J.A. Johnson 113

Statistical effects on the evolution of compliance and compressive fracture stress of ice
J. Kim and S. Shyam Sunder 137

Fatigue of freshwater ice
L.J. Weber and W.A. Nixon 153

Research Papers

A semi-empirical model for heat transfer and ice accretion on aircraft wings in supercooled clouds
S.A. Sherif, N. Pasumarthi and C.S. Bartlett 165

Modelling vertical and lateral water flow in frozen and sloped forest soil plots
D. Stadler, H. Flühler and P.-E. Jansson. 181

An evaluation of three numerical models used in simulations of the active layer and permafrost temperature regimes
V.E. Romanovsky, T.E. Osterkamp and N.S. Duxbury 195

Onshore ice pile-up: a comparison between experiments and simulations
M.A. Hopkins 205

Mechanical strength of polycrystalline ice under uniaxial compression
M. Arakawa and N. Maeno 215
